laptop ergonomics

laptop tray for visidec focus micro & single monitor arms

The laptop tray accessory is an innovative upgrade to the Visidec Focus arms VF-AT and VF-M. It maximises desk space and reduces the potential for occupational injury for notebook users. The ventilated tray supports notebooks of up to 18" and fits onto your existing monitor mount. It has its own arm that can be set at the optimum height to ensure a healthy posture. Viewing angle can be tilted by 25 degrees to reduce screen glare and advanced cable management removes wire clutter. The overall effect is a more ergonomic workspace, leaving the user free to achieve their productive and creative potential.

visidec focus vf-m

visidec focus vf-at

facio codes:
focus micro arm: VF-M
focus arm: VF-AT
laptop tray (no pole):
VF-AT-NK
laptop tray (with pole):
VF-AT-NP

key benefits
